## Description:

Children will receive personal guidance while learning about famous artists, art techniques and art history from around the world. In this course students will learn how to "see" in a new way. Children will explore drawing, painting and other art mediums. The fundamentals of art will be established while strengthening individual creativity.

In this course children will be encouraged to understand that art is not just about painting, drawing or making something. It is an amazing subject area where we can learn, together, discuss, share ideas, create, observe, feel and be ourselves. The students need to know and *truly believe* they are artists too and part of our learning journey is to discover and bring out that creativity and start **thinking like artists**.

## Course Objectives

At the completion of the course, the student will be familiar with the following aspects of art making –

- Fundamental drawing skills (line, pattern)
- Fundamental art skills (composition, balance, scale, proportion)
- Expanded art vocabulary
- Art history
- Fundamental painting skills (colour theory and techniques)
- Expanded imagination and creativity

## MATERIALS

New students should talk to the tutor prior to the first class to discuss the materials needed.
